Metal Exchange Corporation, founded in 1974, is the flagship of a growing, global family of companies focused in aluminum and other nonferrous materials. Our business includes trading, marketing, manufacturing, scrap processing, distribution and transportation.

MEC maximizes the value of nonferrous metal for our commercial partners by always being prepared to make a market for these products. Through our extensive network of commercial partners and our own manufacturing and processing facilities, MEC is the industry gateway to the best sources and consumers throughout the world.
