

OUR SOLUTIONS & CAPABILITIES

Metal Exchange boasts nearly 50 years of experience in the aluminum industry. In that time, we have been involved in a wide range of activities related to buying, selling, manufacturing, processing, and trading metals and alloys, across over thirty countries.

Diverse Portfolio

We've been buying, selling, manufacturing, processing, melting, casting, recycling and trading various metals and alloys for nearly 50 years, including: aluminum, copper, brass, magnesium and stainless steel.

Versatile Market Roles

We serve as a market-maker, agent, physical broker, and selling or buying representative based on the needs of our customers

Global Presence

We're active in more than 30 countries globally and have extensive experience in the transportation, warehousing and financing of global supply chains.

Risk Management Expertise

We actively manage market risk and help our customers identify, quantify, model and manage their own risk using LME and COMEX financial instruments.

Extensive Warehouse Network

Leveraging our extensive network of third-party warehouse relationships allows us to store, segregate, aggregate, stage and deliver material to meet all of our customers supply chain needs.

Working Capital Management

We can help customers manage working capital and inventory needs.

Comprehensive Transportation Services

We operate a private fleet of tractors and specialized trailers to support the our customers' needs and to meet even the most unique transportation requirements. In addition to being active in the brokered and dedicated transportation of goods, we manage transportation, handling and storage needs - around the world or down the street - including ocean transport, rail or trucking.

Supply Chain Management

We can manage the supply chain for our customers or assist them in its management.

Scrap Processing and Recovery

We can process your metal scrap and related materials or help you manage the recovery, reclamation and value retention of this material.

Distributor Role

Acting as a distributor for various metals and alloys, Metal Exchange Corporation plays a crucial role in bridging the gap between producers and end-users, ensuring a smooth flow of materials in the market.
